1. A nucleic acid present in other than its natural environment, wherein said nucleic acid encodes a chromo- or fluorescent protein and is from a non-bioluminescent Cnidarian species.
2. The nucleic acid according to Claim 1, wherein said non-bioluminescent Cnidarian species is an Anthozoan species.
3. The nucleic acid according to Claim 1, wherein said nucleic acid is isolated.
4. A nucleic acid present in other than its natural environment, wherein said nucleic acid encodes an Anthozoan chromo- or fluorescent protein and is from a non-Pennatulacean Anthozoan species.
5. The nucleic acid according to Claim 4, wherein said nucleic acid is isolated.
6. A nucleic acid having a sequence of residues that is substantially the same as or identical to a nucleotide sequence of at least 10 residues in length of SEQ ID NOS:01, 03, 05, 07, 09, 11, 13, 15, 17.

Art Unit: 0

7. The nucleic acid according to Claim 6, wherein said nucleic acid has a sequence similarity of at least about 60% with a sequence of at least 10 residues in length selected from the group of sequences consisting of SEQ ID NOS: 01, 03, 05, 07, 09, 11, 13, 15, 17.
8. A nucleic acid present in other than its natural environment that encodes a chromo and/or fluorescent protein, wherein said protein is either:
 - (a) from a non-bioluminescent Cnidarian species; or
 - (b) from a non- Pennatulacean Anthozoan species.
9. The nucleic acid according to Claim 8, wherein said non-bioluminescent Cnidarian species is an Anthozoan species.
10. The nucleic acid according to Claim 9, wherein said nucleic acid is isolated.
11. The nucleic acid according to Claim 9, wherein said protein has an amino acid sequence selected from the group consisting of: SEQ ID NOS: 02; 04; 06; 08; 10; 12; 14; 16; and 18.
12. A nucleic acid that encodes a mutant protein of a chromo and/or fluorescent protein that is either:
 - (a) from a non-bioluminescent Cnidarian species; or
 - (b) from a non- Pennatulacean Anthozoan species.
13. The nucleic acid according to Claim 12, wherein said non-bioluminescent Cnidarian species is an Anthozoan species.
14. The nucleic acid according to Claim 12, wherein said mutant protein comprises at least one point mutation as compared to its wild type protein.
15. The nucleic acid according to Claim 12, wherein said mutant protein comprises at least one deletion mutation as compared to its wild type protein.

Art Unit: 0

16. A fragment of the nucleic acid selected from the group consisting of:

- (a) a nucleic acid encoding a chromo- or fluorescent protein from a non-bioluminescent Cnidarian species;
- (b) a nucleic acid encoding an Anthozoan chromo- or fluorescent protein from a non-Pennatulacean Anthozoan species;
- (c) a nucleic acid having a sequence of residues that is substantially the same as or identical to a nucleotide sequence of at least 10 residues in length of SEQ ID NOS:01, 03, 05, 07, 09, 11, 13, 15, 17; and
- (d) a nucleic acid that encodes a mutant protein of an Anthozoan chromo and/or fluorescent protein that is either:
 - (i) from a non-bioluminescent Cnidarian species; or
 - (ii) from a non- Pennatulacean Anthozoan species.

17. The fragment according to Claim 16, wherein said non-bioluminescent Cnidarian species is an Anthozoan species.

18. An isolated nucleic acid or mimetic thereof that hybridizes under stringent conditions to a nucleic acid selected from the group consisting of:

- (a) a nucleic acid encoding a chromo- or fluorescent protein from a non-bioluminescent Cnidarian species;
- (b) a nucleic acid encoding an Anthozoan chromo- or fluorescent protein from a non-Pennatulacean Anthozoan species;
- (c) a nucleic acid having a sequence of residues that is substantially the same as or identical to a nucleotide sequence of at least 10 residues in length of SEQ ID NOS:01, 03, 05, 07, 09, 11, 13, 15, 17;
- (d) a nucleic acid that encodes a mutant protein of an Anthozoan chromo and/or fluorescent protein that is either:
 - (i) from a non-bioluminescent Cnidarian species; or
 - (ii) from a non- Pennatulacean Anthozoan species; and
- (e) fragments of the above sequences;
or its complementary sequence.

19. The nucleic acid according to Claim 18, wherein said non-bioluminescent Cnidarian species is an Anthozoan species.

Art Unit: 0

20. A construct comprising a vector and a nucleic acid selected from the group consisting of:

- (a) a nucleic acid encoding a chromo- or fluorescent protein from a non-bioluminescent Cnidarian species;
- (b) a nucleic acid encoding an Anthozoan chromo- or fluorescent protein from a non-Pennatulacean Anthozoan species;
- (c) a nucleic acid having a sequence of residues that is substantially the same as or identical to a nucleotide sequence of at least 10 residues in length of SEQ ID NOS:01, 03, 05, 07, 09, 11, 13, 15, 17;
- (d) a nucleic acid that encodes a mutant protein of a chromo and/or fluorescent protein that is either:
 - (i) from a non-bioluminescent Cnidarian species; or
 - (ii) from a non-Pennatulacean Anthozoan species;
- (e) a fragment of the above nucleic acids; and
- (f) a nucleic acid or the complement thereof that hybridizes under stringent conditions to the above nucleic acids.

21. The construct according to Claim 20, wherein said non-bioluminescent Cnidarian species is an Anthozoan species.

Claim 22. (Amended) An expression cassette comprising:

- (a) a transcriptional initiation region in an expression host;
- (b) a nucleic acid selected from the group consisting of the nucleic acids according to Claim 1; and
- (c) a transcriptional termination region functional in said expression host.

23. A cell, or the progeny thereof, comprising an expression cassette according to Claim 22 as part of an extrachromosomal element or integrated into the genome of a host cell as a result of introduction of said expression cassette into said host cell.

Claims 24 and 25 have been cancelled.

Art Unit: 0

26. (Amended) A transgenic cell or the progeny thereof comprising a transgene selected from the group consisting of a nucleic acids according to Claim 1.

27. (Amended) A transgenic organism capable comprising a transgene selected from the group consisting of a nucleic acids according to Claim 1.

Claim 28 has been cancelled.

29. (Once Amended) In an application that employs a nucleic acid encoding a chromo- or fluorescent protein, the improvement comprising:
employing a nucleic acid according to Claim 1.

30. (Once Amended) A kit comprising a nucleic acid according to Claim 1 and instructions for using said nucleic acid.
